More Information

Paul CASWELL contacted Ecology at 0924 on 03/05/2019.

An estimated 4,000 gallons of domestic waste water and sewage discharged from a pipe into the Sinclair Inlet, due to a broken pressure sensor.

The release began at 1330 on 03/02/2019 and was originally believed to be a salt water release - it was later determined to be a domestic waste water pipe. The pipe was shut down at 1455 on 03/03/2019.
